# Pipe Pro

**Drain Tile design & installation: fast & easy!**

AGPS-Pipe Pro is the only program that automatically calculates tile depth and slope then controls installation.

Maximize your profits with the **AGPS-Pipe Pro** software package! This powerful program takes full advantage of RTK GPS, improving your efficiency by automatically designing tile profiles utilizing vertical curve algorithms.

Laser owners can utilize the power of **AGPS-Pipe Pro** with more flexible slope calculations and DGPS positioning.

**The user friendly touch-screen allows you to survey, design and lay tile, by pressing a couple of buttons! Design changes can be easily made on the go.**

The **AGPS-Pipe Pro** display gives you real time guidance and tile depth information. The top view allows you to set and rotate a grid to reduce or eliminate flagging!

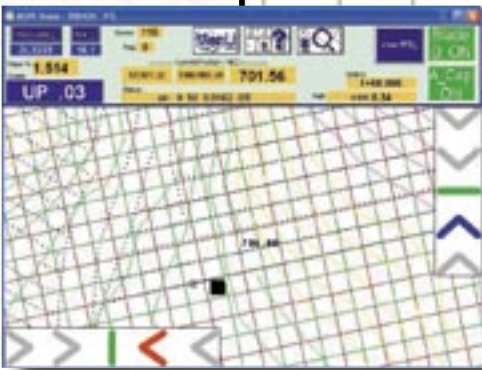

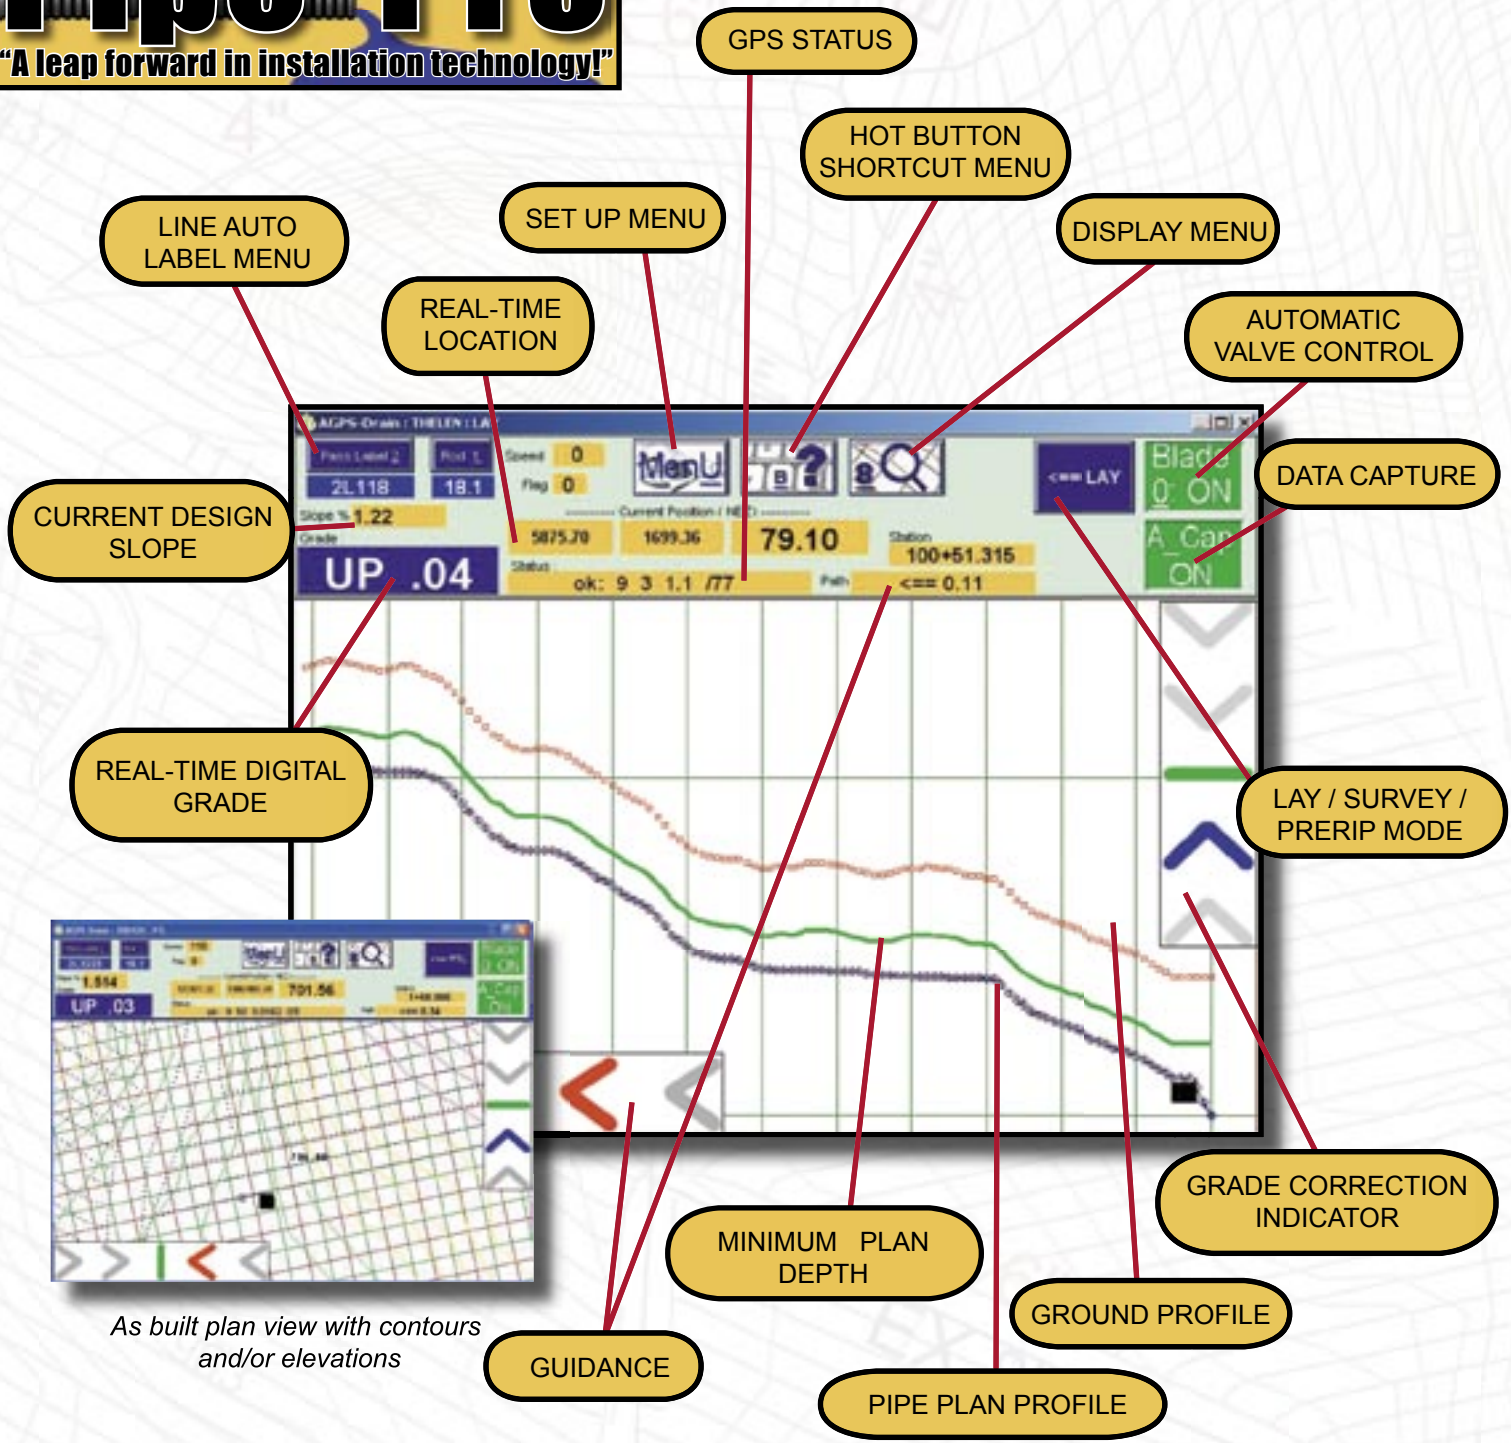

## **Powerful!**

- Save & recall fields • Auto-pass naming
- Touch-screen control • Survey mode
- Create topo map • Import topo map
- Real-time profile view • Real-time topo view
