Here is some **Important News** from Greenvalley Equipment Inc.'s AMS Department!!

On behalf of Greenvalley Equipment Inc., I would like to thank you for your support, both past and present. We sincerely appreciate your business, and look forward to working with you and your farm for years to come. For this reason, we want to inform you of an important announcement from John Deere Ag Management Solutions (AMS).

Since 2005, John Deere AMS has offered the AutoTrac Activation Transition program. This program has allowed current customers to transfer their AutoTrac activation from the original GreenStar™ display to the GreenStar 2 (GS2) 2600 or GS2 1800 Display for a fee. **The AutoTrac activation transition program will be discontinued effective 1 April 2010.** If you have been considering the **upgrade to a GreenStar 2** display, there is no better time than **now!**

Now please be assured that if you are happy with your existing GreenStar Original System, it will continue to function and perform as it has in the past. In fact, Greenvalley Equipment Inc. and John Deere AMS will continue to sell and support this product in 2010 and beyond. In order to be eligible for the remainder of this transition program, new GS2 displays must be ordered prior to 31 December 2009.

The ability to transfer AutoTrac activations and other applications between GS2 displays will still be available through StellarSupport™ or the Customer Contact Center (1-888-GRN-STAR). This includes transfers between two GS2 1800 Displays, transfers between two GS2 2600 Displays, and transfers between a GS2 1800 Display and a GS2 2600 Display.

Again, we want to thank you for your continued support, and look forward to serving you in 2010!
